

F2 for Correspondence Management

Functionality

cBrain has a standard F2 system for correspondence management that enables any ministry and agency to digitize the traditional paper-based management. It thereby allows any authority to have a complete digital production system which is able to perform all government tasks digitally and at the same time automatically comply with all legal and data security requirements.

Key Benefits

The solution supports all necessary functionalities such as cases, communication, roles, approvals, requests, compliance, archiving and knowledge sharing.

Software

The F2 technology stack is infrastructure agnostic and can be implemented on-premise, within government private clouds, or on commercial public cloud providers.

Project time and costs

Total project time from design to go live: 1 month

About F2 and The Solution Gallery

F2 is like a Swiss Army Knife for government digitization. The standard software can support almost any type of organization, and process templates make it easy to reuse best practices and proven process solutions. F2 can be used just for a smaller department and without process configuration, it can be used for a specific process, or it can be implemented for the entire organization and multiple processes.

A process template can be copied and reconfigured, and process templates thereby offer fast track and low-risk digitization. Working with many different customers and projects across countries, we have a build experience and a large library of process templates ready for reuse.

If you look to fast track to digitizing based on proven solutions, please have a look into our solution gallery and get inspired. Find a process template and have it re-configured for your specific requirements.

About cBrain

cBrain is listed at Nasdaq-OMX with offices in Europe, the USA, and the United Arab Emirates. In Denmark, which ranks number one in the global UN E-government index, we serve more than 50 government organizations and 2/3 of all Danish ministerial departments run their business on our software.

We believe in a society based on democracy with digitization being the enablers for a new generation of strong, transparent, and efficient government institutions. Please see our CSR report and SDG 16 commitment to help to develop strong and accountable institutions.
