

F2 for Grants Management

Functionality

A platform for a more effective approach to grants management where all processes are gathered in the same software, including the overall pool administration. The process covers all tasks from self-service to case management and filing, as well as several functions to prevent misuse of funds.

Key Benefits

The congregated process permits a faster processing time, and it limits mistakes and prejudice as the process is largely automated and every application follows the same steps.

Software

The project can use an agile approach, working with university employees to create initial prototypes. Building on the F2 core, with automated email integration, so users are able to store correspondence records and attachments in a single place, as well as case templates and checklists to manage the end-to-end process. The checklists include additional data fields to capture specific research-related information.

Project time

Project time 5 months

About F2 and The Solution Gallery

F2 is like a Swiss Army Knife for government digitization. The standard software can support almost any type of organization, and process templates make it easy to reuse best practices and proven process solutions. F2 can be used just for a smaller department and without process configuration, it can be used for a specific process, or it can be implemented for the entire organization and multiple processes. A process template can be copied and reconfigured, and process templates thereby offer fast track and low-risk digitization. Working with many different customers and projects across countries, we have a build experience and a large library of process templates ready for reuse.

If you look to fast track to digitizing based on proven solutions, please have a look into our solution gallery and get inspired. Find a process template and have it re-configured for your specific requirements.

About cBrain

cBrain is listed at Nasdaq-OMX with offices in Europe, the USA, and the United Arab Emirates. In Denmark, which ranks number one in the global UN E-government index, we serve more than 50 government organizations and 2/3 of all Danish ministerial departments run their business on our software. We believe in a society based on democracy with digitization being the enablers for a new generation of strong, transparent, and efficient government institutions. Please see our CSR report and SDG 16 commitment to help to develop strong and accountable institutions.
