

F2 for Managing Grants and Subsidies

Functionality

Get a streamlined and consistent process for a number of different Grant Management schemes, as well as minimize the risk of fraud and errors when using separation of duties. cBrain's grant management solution gives citizens a simple and up-to-date application process that provides better quality of applications.

F2's separation of duties can be configured based on criteria defined by the authority.

Key Benefits

A minimum of reflux to applicants, as the quality of data from the citizen has been increased. The citizen fills out a larger part of the process him/herself.

A safe, consistent and transparent case management process.

Management and reporting tools to keep up with progress.

Integrations that enhance data quality and eliminate manual workflows.

The citizen journey improves with automation of the process and increased security concerning fraud, which will increase citizens' confidence in the system. Transparency is also the guarantor's guarantee of fair and effective treatment.

Software

F2 Basis system with Grant Management and funds overview. In addition, the solution comes with 2 citizen-facing self-service applications for grants and payment requests. 4 hearing pages. 2 proceedings for the processing of an application for a grant and a request for payment. 1 case process that collects, defines and processes the pool of applications.

Project time

Project time 6 months

About F2 and The Solution Gallery

F2 is like a Swiss Army Knife for government digitization. The standard software can support almost any type of organization, and process templates make it easy to reuse best practices and proven process solutions. F2 can be used just for a smaller department and without process configuration, it can be used for a specific process, or it can be implemented for the entire organization and multiple processes. A process template can be copied and reconfigured, and process templates thereby offer fast track and low-risk digitization. Working with many different customers and projects across countries, we have a build experience and a large library of process templates ready for reuse.

If you look to fast track to digitizing based on proven solutions, please have a look into our solution gallery and get inspired. Find a process template and have it re-configured for your specific requirements.

About cBrain

cBrain is listed at Nasdaq-OMX with offices in Europe, the USA, and the United Arab Emirates. In Denmark, which ranks number one in the global UN E-government index, we serve more than 50 government organizations and 2/3 of all Danish ministerial departments run their business on our software. We believe in a society based on democracy with digitization being the enablers for a new generation of strong, transparent, and efficient government institutions. Please see our CSR report and SDG 16 commitment to help to develop strong and accountable institutions.
